

1. Pattern-added Periodic Table

Use patterns and textures to show contrast. It might be difficult to color blind users to interpret the periodic table.

2. Linear Timer

If objectives or questions are given, a linear timer will be activated. It fuels the user's enthusiasm and can reduce the amount of experience time.

3. Silicate Playground

Users can form single units, double units, chains, sheets, rings and framework structures. Users set their own start point and can make any mineral in Silicate class.

4. Toggle Accessibility

Toggle between Periodic table and pattern Periodic table.
